

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

### Editorial Staff.

E. G. CONKLIN—*The University of Pennsylvania.*

JACQUES LOEB—*The University of California.*

T. H. MORGAN—*Bryn Mawr College.*

W. M. WHEELER—*The University of Texas.*

C. O. WHITMAN—*The University of Chicago.*

E. B. WILSON—*Columbia University.*

### Managing Editor.

FRANK R. LILLIE—*The University of Chicago*

VOLUME VI.

WOODS HOLL, MASS.  
DECEMBER, 1903, TO MAY, 1904.

PRESS OF  
THE NEW ERA PRINTING COMPANY,  
LANCASTER, PA.

# CONTENTS OF VOL. VI.

## NO. 1. DECEMBER, 1903

	PAGE.
C. M. CHILD: <i>Form Regulation in Cerianthus, II. The Effect of Position, Size and Other Factors upon Regeneration, II. Discussion of Results.</i> .....	I
CHARLES ZELENY: <i>A Study of the Rate of Regeneration of the Arms in the Brittle-star, Ophioglypha lacertosa.</i> .....	12
D. B. CASTEEL AND E. F. PHILLIPS: <i>Comparative Variability of Drones and Workers of the Honey Bee</i> .....	18
HENRY H. LANE: <i>The Ovarian Structures of the Viviparous Blind Fishes, Lucifuga and Stygicola.</i> .....	38

## NO. 2. JANUARY, 1904

C. M. CHILD: <i>Form Regulation in Cerianthus, III. The Initiation of Regeneration.</i> .....	55
E. A. ANDREWS: <i>An Aberrant Limb in a Cray-fish</i> .....	75
ROBERT M. YERKES: <i>The Reaction-time of Gonionemus murbachii to Electric and Photoc Stimuli</i> .....	84

## NO. 3. FEBRUARY, 1904

E. G. SPAULDING: <i>The Special Physics of Segmentation as shown by the Synthesis, from the Standpoint of Universally Valid Dynamic Principles, of all the Artificial Parthenogenetic Methods.</i> .....	97
N. YATSU: <i>Experiments on the Development of Egg Fragments in Cerebratulus.</i> .....	123
THOS. H. MONTGOMERY, JR.: <i>Some Observations and Considerations upon the Maturation Phenomena of the Germ Cells.</i> ...	137

## NO. 4. MARCH, 1904

T. H. MORGAN: <i>Notes on Regeneration.</i> .....	159
E. H. HARPER: <i>Notes on Regulation in Stylaria lacustris</i> .....	173
CARL HARTMANN: <i>Variability in the Number of Teeth on the Claws of Spiders, showing their Unreliability for Systematic Description.</i> .....	191
E. P. LYON: <i>A Biological Examination of Distilled Water.</i> .....	198

## No. 5. APRIL, 1904

HARRY BEAL TORREY: <i>On the Habits and Reactions of Sagartia davisii</i> .....	203
FRANK E. LUTZ: <i>Variation in Bees</i> .....	217
ALBERT M. REESE: <i>The Sexual Elements of the Giant Salamander, Cryptobranchus allegheniensis</i> .....	220
E. G. SPAULDING: <i>The Rhythm of Immunity and Susceptibility of Fertilized Sea-urchin Eggs to Ether, to HCl, and to Some Salts</i> .....	224
GEORGE T. HARGITT: <i>Budding Tentacles of Gonionemus</i> .....	241

## No. 6. MAY, 1904

WILLIAM MORTON WHEELER: <i>A Crustacean-eating Ant (Leptogenys elongata) Buckley</i> .....	251
WM. S. MARSHALL: <i>The Marching of the Larva of the Maia Moth, Hemileuca maia</i> .....	260
C. M. CHILD: <i>Form-Regulation in Cerianthus, IV. The Rôle of Water-Pressure in Regeneration</i> .....	266
HELEN DEAN KING: <i>Notes on Regeneration in Tubularia crocea. Research Seminar of the Marine Biological Laboratory for the Year 1903</i> .....	307
